

Why Choose Live Entertainment?

You may not think so but the selection of your Entertainment and Master of Ceremonies for a wedding is probably one of the most important decisions you will make. All your personal requirements like The dress, the venue, the cake, the flowers etc are your special preferences and even those special songs for those special moments.

But from my experience it is important to remember that your adult reception guests usually range in age from 18 to 60, 70, 80 and sometimes older. ?? So for you, selecting the right types of music, on their behalf, can be very difficult. One thing Brides and Grooms always say about the entertainment is “We just want the night to run smoothly and all our guests to enjoy the night”. Their tastes in music can range from the 50’s to the 2000’s, from Rock to disco, from country to rock and roll to mention a few. You also need appropriate quiet dinner style music. All of which should be performed and or presented professionally with personality, style and charisma.

Live music adds a very important personal touch to your reception.

Your MC must know correct protocols, be organised, professional, and flexible, sober, a little humorous and be good at crowd control. (party-goers can become a little unruly) Must take the time beforehand to meet with and get to know you. Find out what you like and don’t like. A relative/friend of the family MC means well and may be cheaper, however most lack experience and presentation. Let’s face it, they too are there, as a guest, to have a good time, so by half way through the night they are more interested in “having fun” themselves, than carrying out their MC duties.

With my experience and working with you, we can ensure your night goes smoothly and your guests happily dance the night away.
